

Tutorial No : 10

Tutorial Title: Write a C++ program which uses Try and Catch for exception handling.

Name of Student: Aditya Ringane

Class: ET

Div: 2

PRN No:B25ET1121

Batch:B

Program:

```
#include <iostream>
using namespace std;

int main() {
    int a, b, c;

    cout << "Enter a value for a: ";
    cin >> a;

    cout << "Enter a value for b: ";
    cin >> b;

    try {
        if( b == 0){
            throw b;
        }

        c = a / b;
        cout << "The div \t << c";
    }

    catch(int x){
        cout << "\nDiv by zero not permitted";
        cout << "The error is div by: \t" << x;
    }

    cout << endl << "At the end of main() function";

    return 0;
}
```

Output :

Output

Enter a value for a: 10

Enter a value for b: 4

The div << c

At the end of main() function

=== Code Execution Successful ===
