

Tutorial No : 1

Tutorial Title: Find out the sum of even numbers between 1 to 50 using loops.

Name of Student: Aditya Ringane

Class: ET

Div: 2

PRN No:B25ET1121

Batch:B

Program:

```
#include <iostream>
```

```
using namespace std;
```

```
int fac(int k) {  
    int res = 1;  
    for (int i = k; i >= 1; i--) {  
        res = res * i;  
    }  
    return res;  
}
```

```
int binocoeff(int m, int l) {  
    int coeff = fac(m) / (fac(l) * fac(m - l));  
    return coeff;  
}
```

```
void printpascal(int d) {  
    for (int i = 0; i < d; i++) {  
        for (int space = 0; space < d - i; space++) {  
            cout << " ";  
        }  
        for (int j = 0; j <= i; j++) {  
            cout << " " << binocoeff(i, j);  
        }  
        cout << endl;  
    }  
}
```

```
int main() {  
    int n;  
    cout << "enter the no of rows: ";  
    cin >> n;
```

```
    printpascal(n);  
    return 0;  
}
```

Output:

```
Output  
✓ enter the no of rows: 5  
    1  
   1 1  
  1 2 1  
 1 3 3 1  
1 4 6 4 1  
  
=== Code Execution Successful ===
```
